

Model: MVF05LA

#### MVF05LA:

The biconical antenna is a kind of vertical polarized omnidirectional antenna. It has similar characteristics to the cone antenna, which has better radiation pattern stability. It is suitable for close communication.

#### FEATURES

- Omnidirectional coverage signal to facilitate communication
- Wide frequency range and bandwidth coverage
- Easy assembly technology, stable structure
- Simple craft and easy to realize

#### MAIN SPECIFICATIONS

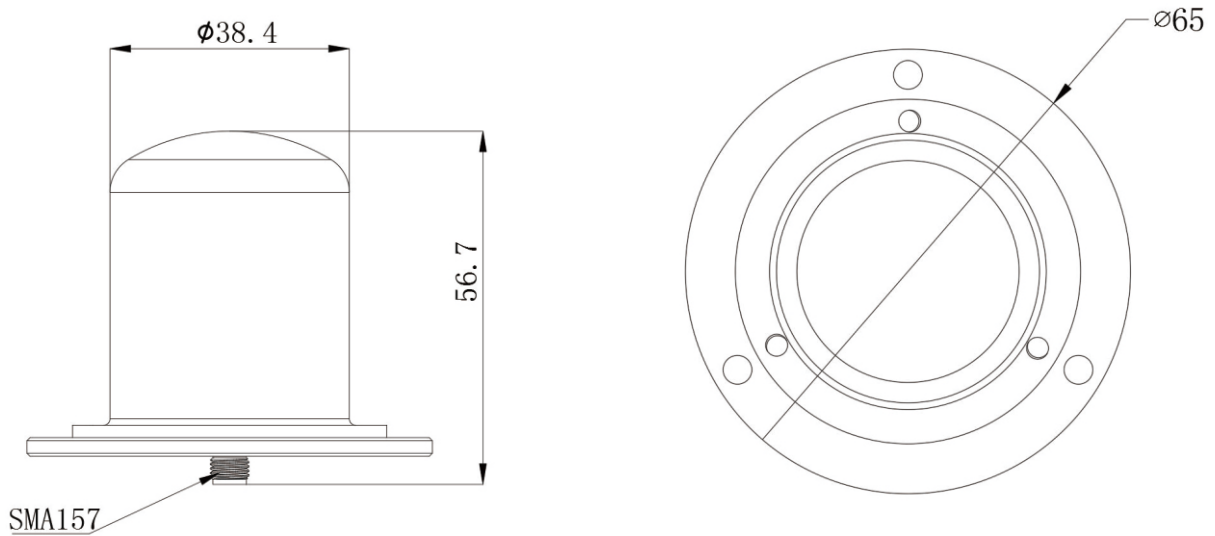

Наименование	Параметры	Единицы измерения
Антенна		
Тип антенны	Биконическая антенна	
Частота	2.0~12.0	Ghz
Усиление антенны	1.10@7.0Ghz	dBi
Поляризация	Linear	
	2 : 1	
Горизонтальная ширина луча	360	°
Вертикальная ширина луча	≥150	°
Не-циркулярность	≤3	dB

Notes: This product can be customized according to the actual needs of the user
