

Model: MVF13CSA

MVF13CSA

The dipole antenna array is installed on the ground for communication with various purposes. It is designed for tracking and communication, suitable for portable use in the field.

FEATURES

- Mental dipole unit designed for high performance
- Wide frequency range and range coverage
- Easy assembly technology and stable structure
- Simple craft and easy to realize
-

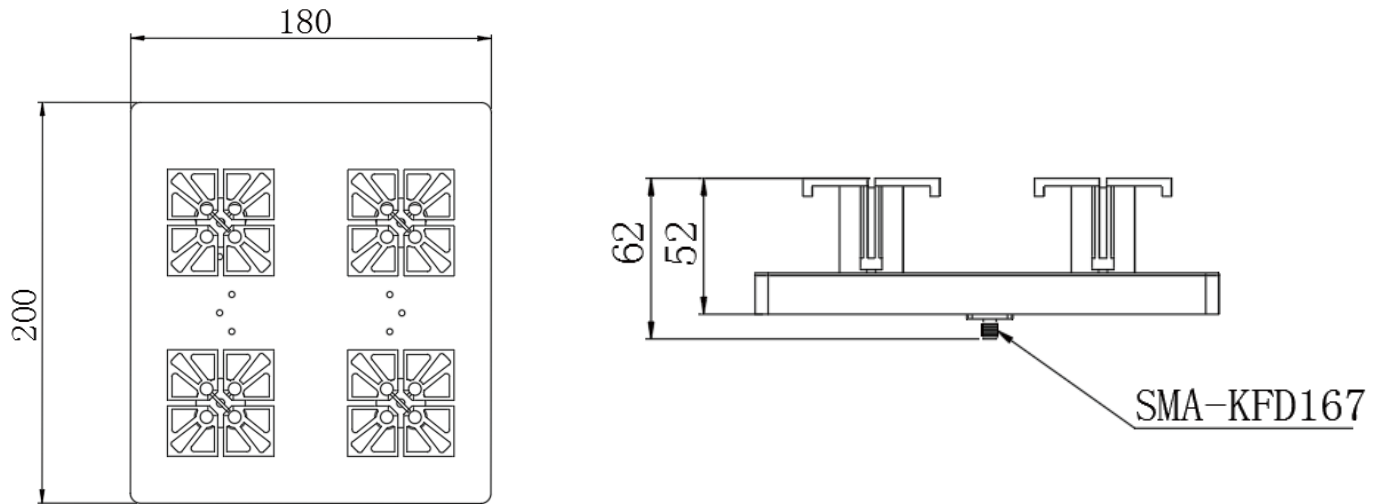

MAIN SPECIFICATIONS

Наименование	Параметры	Единицы измерения
Антенна		
Тип антенны	Дипольная антенная решетка	
Частота	1.9~3.1	GHz
Усиление антенны	11.10 @1.9 GHz 13.75 @3.1 GHz	dBi
Поляризация	Круговая	
КСВ(VSWR)	2.0: 1	
Горизонтальная ширина луча	≥27	°
Вертикальная ширина луча	≥27	°

Notes: This product can be customized according to the actual needs of the user
