

Model: MVO25LXA

Microstrip antenna array MVO25LXA is installed on the ground for communication with various purposes. It is designed for tracking and communication, suitable for portable use in the field.

FEATURES

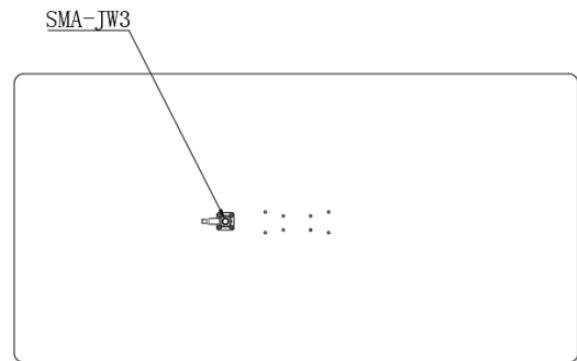

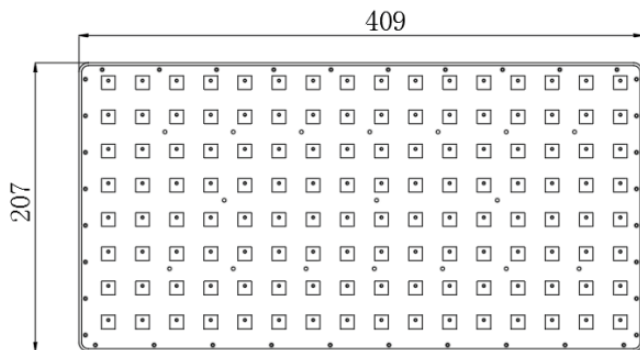

- High performance, convenient for long distance communication
- Patch design, small size, low profile
- Lightweight and easy to carry
- Simple craft and easy to realize

MAIN SPECIFICATIONS

Наименование	Параметры	Единицы измерения
Антенна		
Тип антенны	Микрополосковая антенная решетка	
Частота	8.425~8.525	Ghz
Усиление антенны	26.2@8.5Ghz	dBi
Поляризация	Linear	
	1.5 : 1	
Горизонтальная ширина луча	≥18	°
Вертикальная ширина луча	≥9	°

Notes: This product can be customized according to the actual needs of the user
